

# Leadership for the Circular Transition

October 2021 through February 2022

## Talentprogramme Leadership for the Circular Transition

*Open for application! Are you ready to be the change?*

Are you an entrepreneurial student who wants to contribute to the transition towards a circular society? Then the national leadership for the circular transition is right for you!

### What?

In the Talentprogramme Leadership for the Circular Transition you will work with students from across the Netherlands for four months. Through seven online workshops you will learn everything you need to know to take a lead in the transition towards a circular world. There will also be three physical moments where you come together with all of these students and we end with an exciting national hackathon! Together with the online programme you will work in your own region in a circular living lab guided by your [university or institution]. This is where you will be able to bring the skills you develop directly into action. The programme will ask for about 10 hours of work per week during the four month period.

***Learning by doing! We will challenge you to develop the competencies required to be a successful circular change agent. Are you in?***

### For whom?

The programme is open for all curious (mbo-hbo-wo) students that want to challenge themselves next to their regular study programme. The programme is at HBO+ level and most suitable for students in their third year of study and beyond. Of course, you are welcome to try the programme if you are not yet this far into your studies. The central programme is in English.

### What's in it for you?

- You develop yourself into a circular change agent able to take lead in the circular transition.
- You join in a cool national programme that offers you an unique opportunity to learn outside your regular studies and institution.
- You develop your leadership competencies, build a strong network of (future) leaders and work towards a great addition to your CV.
- You can earn a certificate of completion by completing the entire programme according to the set standards.
